

Aladdin BI-FLEX M7

About BI-FLEX M7

The new BI-FLEX M7 (70W) is the cinematographer's dream come true. A small, lightweight and powerful LED light, built with our new micro LEDs.

The 70W BI-FLEX M7 is a 1'x1'(30x30cm) LED Panel. Its sleek, lightweight design makes this gadget perfect for mobile lighting or studio applications.

With the x-bender you will be able to mount the LED panel on a light stand with a 16mm (5/8) stud. The foldable and lightweight design of the x-bender ensures it will travel light and easy, inside your travel gear. You can mount a diffuser to the x-bender for a softer light.

The Dimmer is Universal up to 70W and runs from main power supply or battery. You can use different sizes of panels with the same dimmer. The two control knobs on the dimmer give you full control over color temperature and intensity.

With the optional DMX module that can be attached to the dimmer, you are ready for a remote application. With this module it will be easy to control the color and intensity of the LED light through your 512 DMX protocol.

For even better light control we offer these accessories:

- Softboxes for soft and even light distribution
- Grids for the softbox for greater precision
- A metal frame for a more solid and rugged hold
- Snoot prevents light spill
- Magnetic holder provides more flexibility in rigging the light.

In the box

1x BI-FLEX M7

1x Dimmer

1x Stand-Mount

1x Power supply 100V-240V

1x Extension cable

1x Diffuser
